THE NEW-YORK MUSICAL REVIEW .-(Published by Mason BROTHERS) has entered upon its sixth year with reneweed vigor and bright hopes for the future. Hereafter, it will contain the usual supprofessor of music, in which it is designa complete guide-book or manual for music teaching. The lively interest in music which Mr. Mason has always exhibited; his active, continued, and successful efforts in popularizing its study in schools and among the people; his extended opportunity for testing the value and workings of various methods of musical instruction, abroad as well as at home; and especially his well-known tact and preeminent success as a practical teacher, warrant us in believing that he will produce a work of high and permanent value. This feature is a novel and important one, and many will doubtess consider it alone worth more than the dollar, which THE MUSICAL REVIEW
